

The Comprehensive VED Solution

The Miracle of Simplicity

FOR PROVIDER.
BY PROVIDERS.

Causes for Erectile Dysfunction (ED)

ED can occur at any age and at any point during a man's sexual life. ED is not a disease, but is instead a side effect of what could be more serious health issues, such as:

- Diabetes
- Medication
- Penile Curvature
- Prostate Cancer
- Vascular Disease
- Hypertension

What is a VED?

A Vacuum Erection Device is the least invasive and most affordable treatment for Erectile Dysfunction (ED) and penile rehabilitation. A VED is a plastic tube that fits over the penis and is pressed against the base of the penis and pubis. It uses a vacuum pump to pull blood into the penis and cause engorgement/erection.

Benefits of Using A SomaTherapy-ED Vacuum Erection Device

- Can be used along with medications or penile implants. For some men a combination of erectile dysfunction treatments works best.
- Over 90% effective. Majority of men can achieve an erection sufficient for sex with practice and correct use.
- Less Risk. The risk of side effects or complications is lower than with any other ED treatment.
- Overall lower cost. After initial purchase, a VED costs less than any other ED treatment.
- Non-Invasive. They don't require surgery, inserting medications into the penis or injections.
- Penile Rehabilitation. A VED is proven in clinical studies to help regain natural erectile function after certain procedures such as prostate surgery or radiation therapy for prostate cancer.

Lifetime Warranty. We offer an optional lifetime warranty on our product for an additional fee.
