**Proxeed® plus.** The patented ingredients in Proxeed plus are designed to support normal sperm development, fertility and reproduction.†

- 1. CARNITINES.** L-carnitine and Acetyl-L-carnitine play a key role in sperm energy metabolism. Many clinical studies have shown that carnitines play an important role in sperm function. L-carnitine is a component of both seminal plasma and sperm cells, and plays a role in sperm maturation and potential sperm motility. Acetyl-L-carnitine also serves as a circulating energy source for sperm and provides primary fuel for sperm motility.<sup>1-4†</sup>
- 2. ZINC/FOLIC ACID COMBINATION.** Zinc is important for the production of semen and contributes to fertility and reproduction.<sup>5†</sup> Folic Acid contributes to the quality of seminal fluid.<sup>7†</sup>
- 3. ANTIOXIDANTS & B<sub>12</sub>.** Selenium is a powerful antioxidant and is thought to maintain the integrity of the sperm flagella.<sup>7†</sup> Coenzyme Q<sub>10</sub> acts as an antioxidant as well as a metabolic substrate, and is concentrated in the mitochondria of the mid-piece of the sperm. Vitamin C is an antioxidant present in the seminal plasma. Vitamin B<sub>12</sub> is involved in cell maturation and DNA synthesis.<sup>†</sup>

With the use of Proxeed plus, taken twice daily, changes in sperm quality may occur in as little as 90 days. However, for maximum benefit it is recommended that Proxeed plus be taken for six months prior to trying to conceive.†
