

# THEROMEGA®

OMEGA-3 FISH OIL SUPPLEMENT

THERALOGIX

# THEROMEGA

# Why TherOmega?

TherOmega is a high-quality omega-3 fish oil supplement designed to support a healthy immune system, promote joint health and mobility, support healthy triglyceride levels, and promote heart, brain, prostate, and eye health.<sup>†</sup> Supportive but not conclusive research shows that consumption of EPA and DHA omega-3 fatty acids may reduce the risk of coronary heart disease.

Produced using a purification process known as molecular distillation, it contains no detectable mercury, PCBs, or other harmful contaminants. TherOmega is also steam-deodorized to minimize fishy burps and aftertaste.

## TherOmega vs. Other Fish Oils

TherOmega meets the highest standards of quality and purity for fish oils, at a highly competitive cost. When comparing prices of fish oil supplements, be sure to compare products according to their amount of EPA (eicosapentaenoic acid) and DHA (docosahexaenoic acid). EPA and DHA are the key omega-3 fatty acids in fish and fish oil supplements. Many fish oil supplements advertise that they contain 1000 mg of fish oil per softgel, but the amount of EPA and DHA may be as low as 300 mg. TherOmega contains 600 mg of EPA and DHA per each 1000 mg fish oil softgel. Check the Supplement Facts label to determine the amount of EPA and DHA, and use this information to compare accurately. TherOmega provides excellent value for the highest-quality product available.

## International Fish Oil Standards (IFOS) Program

With growing concerns regarding the negative effects of mercury and other contaminants in fish, stringent testing and certification of fish oil supplements is very important. The IFOS Program is concerned with the quality of omega-3 products as established by the World Health Organization and the Council for Responsible Nutrition. IFOS tests products for PCBs, mercury, heavy metals, dioxin, furan, and oxidation levels and compares the omega-3 concentration in the product with its label claim.

★★★★★

IFOS has established the 5-Star rating system, which ranks products from "poor" (1 Star) to "exceptional" (5 Stars). TherOmega has received the highest rating of 5 stars from IFOS, based on its quality, purity, and safety.

*TherOmega is independently certified by both NSF International and the IFOS Program.*

# Why Theralogix?

## NSF® International Dietary Supplements Certification

Theralogix is committed to providing only the highest-quality supplements.

TherOmega is tested and certified by NSF International, a not-for-profit organization that is the world leader in standards development and product certification for public health and safety. NSF has implemented the highest quality control standards in the supplements industry. The NSF mark is your best assurance of a dietary supplement's content accuracy, purity, and freedom from contaminants.

Contents Tested & Certified

## Manufactured in an NSF-Registered Facility

The facility where TherOmega is manufactured is registered with NSF as in compliance with current Good Manufacturing Practices (cGMPs). These guidelines define the system of manufacturing processes, procedures, and documentation that assure the identity, strength, composition, and quality of the product.

## Medical Advisory Board

Each Theralogix supplement's formulation is overseen by an advisory board of leading academic physicians and scientists. The Theralogix Medical Advisory Board meets regularly to review recently published clinical studies and makes recommendations and changes to the formulations as appropriate. You can be assured that TherOmega is safe and reflects the most current scientific evidence.
