

THERALITH® XR

VITAMIN & MINERAL SUPPLEMENT

THERALOGIX

THERALITH XR

Why TheraLith XR?

TheraLith XR is an extended-release nutritional supplement formulated to support and maintain normal urine chemistry.*

At the 2006 American Urological Association (AUA) and World Congress of Endourology (WCE) meetings, researchers from Stony Brook University presented the results of taking TheraLith XR on 24-hour urine chemistry measures. After two months, TheraLith XR significantly decreased urinary oxalate levels by 29% and calcium oxalate supersaturation by 22%, and significantly increased urinary magnesium and citrate levels by 48%. In participants with low baseline levels of magnesium and citrate, TheraLith XR increased these measures by more than 300%. Trial participants tolerated TheraLith XR well, with no side effects. (Schulsinger et al, Abstract # 1538)

To learn more about TheraLith XR research and what urine chemistry changes mean for you, talk to your healthcare provider.

Individuals should take TheraLith XR with food and try to drink at least eight to ten glasses of fluid per day. TheraLith XR should ideally be used under the supervision of a healthcare provider, as part of a comprehensive diet and lifestyle program designed to support normal urine chemistry.*

Why Theralogix?

NSF® International Dietary Supplements Certification

Theralogix is committed to providing only the highest-quality nutritional supplements. TheraLith XR is tested and certified by NSF International, a not-for-profit organization that is the world leader in standards development and product certification for public health and safety. NSF has implemented the highest quality control standards in the supplements industry. The NSF mark is your assurance of a dietary supplement's content accuracy, purity, and freedom from contaminants.

Manufactured in an NSF-Registered Facility

The facility where TheraLith XR and other Theralogix nutritional supplements are manufactured is registered with NSF and is in compliance with current Good Manufacturing Practices (cGMPs). These guidelines define the manufacturing processes, procedures, and documentation that assure the identity, strength, composition, and quality of the product.

Medical Advisory Board Oversight

The leading academic physicians and scientists of the Theralogix Medical Advisory Board meet regularly to oversee all product formulations. You can be sure that TheraLith XR is safe and reflects ongoing review of the most current scientific evidence. Visit www.theralogix.com to learn more.
